DETAILED ACTION
Terminal Disclaimer

1. The terminal disclaimer filed on February 20, 2001 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,008,760 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23 and 25-29, drawn to a system and method for canceling co-channel interference, classified in class 455, subclass 278.1.
 - II. Claim 24, drawn to a method for determining spatial gain distributions of a plurality received signals, classified in class 455, subclass 67.3.
3. The inventions are distinct, each from the other because of the following reasons:
 - I. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as for cell layout planning. See MPEP § 806.05(d).
 - II. A telephone call was made to Steve Shattil on January 10, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
